

ABHINAY BERE

Aspiring Software Engineer — Full-Stack Developer

Mancherla, Telangana 504219 | Phone: 8309391662 | abhinayvarma11.6@mail.com
linkedin.com/in/bereabhinay | github.com/AbhinayBere | [Portfolio](#)

Summary

B.Tech Computer Science undergraduate with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, and Software Development. Proficient in Java, Python, C++, and SQL, with hands-on experience applying these concepts to build practical applications and solve real-world problems. Familiar with full-stack web development using the MERN stack and committed to writing clean, efficient, and maintainable code. Eager to contribute to software development teams while continuing to strengthen technical through real-world projects.

Education

Vellore Institute of Technology, Andhra Pradesh

B.Tech in Computer Science and Engineering — CGPA: 9.03

2023 – Present

NRI Junior College, Hyderabad

Intermediate (MPC) — 99%

2021 – 2023

Krishnaveni High School, Bellampally

SSC — 100%

2021

Technical Skills

Languages: Java, Python, C, C++, SQL, JavaScript (ES6+)

Web: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, render, Vercel, npm

Core CS: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

Projects

Placement Preparation Platform (MERN Stack)

GitHub: github.com/BEREABHINAY/placement-platform.git | Live Demo: placementprep-wheat.vercel.app/

- Built a full-stack placement preparation platform with MongoDB, Express.js, React.js, and Node.js, implementing JWT-based authentication and OTP-verified two-factor login across 3 user flows (signup, login, password reset).
- Designed 15+ RESTful API endpoints across authentication, courses, tests, and certificate modules using a modular MVC architecture, with centralized error handling securing **100% of protected routes**.
- Deployed a production backend on Render and frontend on Vercel with Brevo's transactional email API for OTP delivery, cross-origin cookie-based sessions, and CORS-secured API access. Integrated Brevo's transactional email API to deliver OTPs within 10-minute expiry windows, and deployed the app across 2 platforms (Render backend, Vercel frontend) with CORS-secured, cookie-based session handling.

Dhriti – Plastic Waste Management Platform

- Architected a full-stack platform connecting waste generators, collection agents, and recycling centers through an end-to-end workflow supporting 3 user roles.
- Modeled a scalable database schema with 8+ collections/entities and engineered the system architecture for request submission, collector assignment, and real-time status tracking.
- Planned and documented 10+ core platform features, including request lifecycle management, notification workflows, role-based access, and recycling coordination

Experience

Hult Prize Club — Technical Team Member / Co-Lead, Documentation Team

2024 – Present

- Contributed to the planning and execution of 5+ club events and was promoted to Co-Lead of the Documentation Team based on consistent performance and contributions.
- Coordinated documentation and knowledge sharing for a team of 15+ members, improving consistency, accessibility, and collaboration across the organization.
- Collaborated with cross-functional teams to manage event documentation, streamline workflows, and ensure timely communication among technical and non-technical stakeholders.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- MERN Full Stack Certification Program — Ethnus
- SQL and Relational Databases 101 — IBM Skills Network
- Data Science Essentials with Python — Cisco Networking Academy
- Data Analytics Job Simulation — Deloitte Forage
- Java Skill Certification — HackerRank
- Foundations of Prompt Engineering — AWS Training and Certification
