

ABHINAY BERE

Aspiring Software Development Engineer

Mancherla, Telangana 504219 | Phone: 8309391662 | abhinayvarma11.6@mail.com
[linkedin.com/in/bereabhinay](https://www.linkedin.com/in/bereabhinay) | github.com/AbhinayBere | [Portfolio](#)

Summary

Aspiring Software Development Engineer pursuing B.Tech in Computer Science, with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming, plus hands-on experience building and shipping full-stack (MERN) and AI-powered applications end-to-end. Comfortable across the stack — from REST API design and database modeling to React front-ends — with a focus on writing clean, scalable, production-ready code.

Education

Vellore Institute of Technology, Andhra Pradesh

B.Tech in Computer Science and Engineering — CGPA: 9.03

2023 – Present

NRI Junior Kalasala, Mallampet

Intermediate (MPC) — 99%

2021 – 2023

Krishnaveni High School, Bellampally

SSC — 100%

2021

Technical Skills

Languages: Java, Python, C, C++, SQL, JavaScript (ES6+)

Web: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs

Databases & Tools: MongoDB, MySQL, Git, GitHub, Postman, VS Code, Docker, Render, Vercel, npm

Core CS: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

Projects

Placement Preparation Platform (MERN Stack)

GitHub: github.com/BEREABHINAY/placement-platform.git | Live Demo: placementprep-wheat.vercel.app/

- Designed a full-stack placement preparation platform using MongoDB, Express.js, React.js, and Node.js, implementing JWT-based authentication and OTP-verified two-factor authentication across three user workflows: signup, login, and password reset.
- Implemented 15+ RESTful API endpoints using a modular MVC architecture for authentication, courses, tests, and certificate management, with centralized error handling securing 100% of protected routes.
- Deployed the application on Render and Vercel with secure cookie-based session management, CORS protection, and Brevo's transactional email service for OTP delivery, creating a production-ready application with reliable user authentication.

DocuMind – AI-Powered RAG Document Intelligence System

GitHub: github.com/BEREABHINAY/DocMind

- Built an end-to-end Retrieval-Augmented Generation (RAG) system using FastAPI, React, Qdrant, Sentence Transformers, and Llama 3.1 (Groq), enabling semantic search and source-grounded Q&A over PDF/text documents with sub-second response times.
- Developed a retrieval pipeline with sliding-window chunking, 384-dimensional embeddings, and Top-K vector search, improving retrieval precision by over 40% while reducing LLM context and inference cost.
- Integrated Docker, automated evaluation scripts, and unit testing, achieving 90%+ retrieval accuracy on benchmark queries with a responsive React interface for real-time document interaction.

Experience

Hult Prize Club — Technical Team Member / Co-Lead, Documentation Team

2024 – Present

- Contributed to the planning and execution of 5+ club events and was promoted to Co-Lead of the Documentation Team based on consistent contributions.
- Coordinated documentation and collaborated with cross-functional teams to improve knowledge sharing and streamline communication across a team of 15+ members.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Java Skill Certification — HackerRank
- SQL and Relational Databases 101 — IBM Skills Network
- MERN Full Stack Certification Program — Ethnus
- Data Analytics Job Simulation — Deloitte Forge
- Data Science Essentials with Python — Cisco Networking Academy
